

## Installation guide for electric screen wiring

### Explanation of parts:

#### 1.

One-to-one connector. You see the separate parts in the image below. They need to be screwed together in the order shown in the photo. Use this if you have one screen.

#### 2.

Y-connector. You see the separate parts in the image below. They need to be screwed together in the order shown in the photo. Use this if you have two screens.

3.

The separate parts are marked with letters and colours. Bronze (G), Gold (L), and Silver (N). It is very important that you connect the cables in the same colour/letter throughout the installation.
